

CANADA: BAYSIDE PORT EXPANSION

Land & Sea Environmental Consultants Ltd. was retained to prepare all environmental documentation for both provincial and federal environmental review of a proposed wharf expansion, Bayside, New Brunswick. Expansion was to facilitate export operations by adjacent aggregate quarry operation and import operations of a gypsum board operation. In addition to preparation of the Environmental Impact Assessment (EIA) and Environmental Action Plan (EAP), Land & Sea also undertook public liaison, open houses and prepared plan for community Roundtable to work with client during construction.

Client: Bayside Port Corp.
