

INDONESIA: PORT ENVIRONMENTAL IMPROVEMENT PROJECT

Land & Sea Environmental Consultants Ltd./OCL Group was retained to assist in the development of a Port Environmental Management Plan, which could be implemented by the Republic of Indonesia (Directorate-General Sea Communications and the four Port Corporations). The study entailed an evaluation of ship waste, oil spill response, dredged material management and overall port environmental management in 20 ports throughout Indonesia. From this project preparation study, a plan was developed to provide for program implementation and training.

Issues addressed in the project were:

- Oil Spill Management (Tier 1 and 2)
- Dredged Material Management
- Ship and Port Waste Management
- Port Environmental Management

The project was to form part of the Indonesian "Clean Air and Clean Seas Initiative" and their Coastal Zone Management Initiative.

Client: World Bank and Government of Republic of Indonesia.
